

Latex gloves for single use	Nitrile gloves for single use	Vinyl gloves for single use
<p><b>Quality:</b> high quality latex <b>Price:</b> standard</p>	<p><b>Quality:</b> very high quality nitrile <b>Price:</b> high</p>	<p><b>Quality:</b> high quality vinyl <b>Price:</b> low</p>
<p><b>Use:</b> These gloves are suitable for use in numerous sectors but are particularly appropriate for large-scale use in the medical, chemical and food industries.</p> <p><b>Note:</b> Latex contains natural rubber, that is, latex, which can cause allergic reactions in some people.</p>	<p><b>Use:</b> These gloves are eminently suitable for use in the medical and chemical sector. Nitrile gloves are made from 100% nitrile (synthetic rubber). They do not contain any natural rubber, that is, latex protein, and are ideal for use by people who are oversensitive to natural rubber proteins. These gloves have a high protective factor for use with chemicals and hydrocarbon compounds, oils and fats. They are highly resistant to wear and relatively resistant to puncturing. Nitrile gloves are very strong, durable and yet flexible in use. Because of its low chemical residues, nitrile reduces the risks of contact allergies. Nitrile gloves are totally allergen free.</p>	<p><b>Use:</b> These gloves are suitable for use in numerous sectors but are particularly appropriate for large-scale use in the chemical and food industries. Very high quality gloves made from P.V.C. Plastisol. They are a good alternative if people are allergic to latex gloves but they are less elastic so that they do not fit the hand as well.</p>
